AGILE IS A JOURNEY .... THAT BEGINS WITH A SINGLE STEP

We're not as agile as we think or would like to be ... yet.

So why is it difficult to implement Agile Testing?

Top 3 Challenges with Agile Testing

- Process: 71% of Respondents
- Tools: 18% of Respondents
- Time: 16% of Respondents
- Communication/Collaboration: 10% of Respondents
- Resources: 10% of Respondents
- Change/Problem with the code: 1% of Respondents
- Money: 1% of Respondents

But what about skills? Do teams have the right ones to perform Agile Testing?

- 58% of teams are reasonably acquainted with Agile Testing

Respondents’ anecdotes ...

- Lack of end-to-end testing during earlier builds introduces functional changes at the end which presents more headaches for development teams and subsequently harder for testing.
- No recognized process for testing within Agile teams. Most teams still fall into longer waterfall or no testing process at all.
- Unless a proper structure is achieved starting from Business to IT, we’ll be looking at a probable downfall of quality.

*Based on survey conducted by Zephyr in March/April 2015.

Zephyr is a leading provider of on-demand, real-time enterprise test management solutions, offering innovative applications, seamless integrations and unparalleled, real-time visibility into the quality and status of software projects. Zephyr products are the ideal test management tool for any organization in the world, with users ranging from small start-ups to global enterprises. Zephyr provides an end-to-end solution for test management that is completely independent of any other development tools and can be used with virtually any live development tool, including tools for development, DevOps, middleware, IT services, and enterprise software. Zephyr is headquartered in Newark, CA with offices in Europe and India.
